BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

As rescanning documents *will not* correct images,
please do not report the images to the
Image Problem Mailbox.

In the Claims

Claims 1, 8, 14-35 and 60-68 were previously cancelled without prejudice.

Claim 36 is amended.

Claims 80-94 were previously added.

Claims 2-7, 9-13, 36-59, 69-94 remain in the application and are listed below.

1. (Cancelled).

2. (Previously Presented) The method of claim 6 further comprising automatically removing said at least one command from the display responsive to a change in the user's context.

3. (Previously Presented) The method of claim 6, wherein the application program comprises a document-centric application program and said displaying does not obscure a document in which the user is working.

4. (Previously Presented) The method of claim 6, wherein the application program comprises a document-centric application program and said at least one command is displayed in a modeless fashion in which the user can continue to work within a document while said at least one command is displayed.

5. (Previously Presented) The method of claim 6 further comprising after said displaying, executing a command without requiring any action from a user other than selecting the command.

1
2 6. (Previously Presented) A method of exposing commands in a
3 software application program comprising:

4 determining a user's context within an application program by ascertaining
5 a position of a user's cursor within a document provided by the application
6 program; and

7 automatically displaying at least one command on a display for the user
8 based on the user's context.

9
10 7. (Previously Presented) The method of claim 6, wherein said
11 determining comprises ascertaining a user's selection within a document provided
12 by the application program.

13
14 8. (Cancelled).

15
16 9. (Previously Presented) The method of claim 6, wherein said context
17 pertains to various tasks the user may attempt to accomplish.

18
19 10. (Previously Presented) The method of claim 6, wherein said context
20 further pertains to one or more of the following: a type of document the user is
21 working in; and a state of a document the user is working in.

22
23 11. (Previously Presented) The method of claim 6, wherein said
24 displaying is independent of a user selecting any displayed menu item.
25

12. (Previously Presented) One or more computer-readable media having computer-readable instructions thereon which, when executed by a computer, cause the computer to:

determine a user's context within an application program;
automatically display, independent of the user selecting any displayed menu item, at least one command on a display for the user based on the user's context, said at least one command being displayed in a modeless fashion in which the user can continue to work within a document provided by the application program while said at least one command is displayed; and
automatically remove said at least one command from the user's display responsive to a change in the user's context.

13. (Original) The computer-readable media of claim 12, wherein the computer determines the user's context by one or more of the following:

ascertaining a position of a user's cursor within a document provided by the application program; and
ascertaining a user's selection within a document provided by the application program.

14.-35. (Cancelled).

36. (Currently Amended) A method of exposing commands in a software application program comprising:

determining a user's context within an application program by evaluating at least portions of one or more expressions, each expression being associated with a

1 context block and defining a condition that describes one or more aspects of a
2 user's interaction with the application program; and

3 automatically displaying, independent of a user selecting any displayed
4 menu item, at least one context block on a display for the user based on the user's
5 context, individual context blocks containing multiple commands that are possible
6 selections for a user based upon their context.

7
8 37. (Original) The method of claim 36, wherein the expressions evaluate
9 to Boolean values.

10
11 38. (Previously Presented) The method of claim 36, wherein a user's
12 context can be affected by one or more of the following: a document type, a
13 document state, and objects within a document that can be selected by the user.

14
15 39. (Previously Presented) The method of claim 36, wherein said
16 displaying comprises displaying a context block having a title bar area that labels
17 the context block.

18
19 40. (Original) The method of claim 39, wherein the title bar area is
20 configured to enable the context block to be toggled between expanded and
21 collapsed states.

22
23 41. (Original) The method of claim 39, wherein the title bar area
24 comprises a menu display button that is configured to enable a menu that is
25 associated with the context block to be displayed.

1
2 42. (Original) The method of claim 41, wherein the menu display button
3 is associated with a menu that contains links to one or more context panes, each
4 context pane comprising additional context-sensitive commands.

5
6 43. (Previously Presented) The method of claim 36, wherein said
7 displaying comprises displaying a context block with a controls area that exposes
8 the multiple commands to the user.

9
10 44. (Original) The method of claim 43, wherein a command display
11 within the controls area is defined in HTML.

12
13 45. (Previously Presented) The method of claim 36, wherein said
14 displaying comprises displaying said at least one context block in a modeless
15 fashion.

16
17 46. (Previously Presented) A method of exposing commands in a
18 software application program comprising:

19 determining a user's context within an application program without
20 requiring the user to make a menu selection;

21 based on the user's context, displaying commands that are associated with
22 the context and which can assist the user in accomplishing a task; and

23 while the commands are being displayed, enabling the user to select and
24 apply various commands multiple times.

25

1 47. (Original) The method of claim 46 further comprising applying one
2 or more selected commands, when selected by a user, without further user
3 interaction.

4
5 48. (Original) The method of claim 46, wherein said displaying
6 comprises displaying the commands responsive to the user selecting from a menu
7 that is supported by an automatically-appearing and disappearing context block
8 that contains context-sensitive commands.

9
10 49. (Original) The method of claim 46, wherein said displaying
11 comprises displaying the commands in a modeless manner.

12
13 50. (Original) The method of claim 46, wherein said displaying
14 comprises displaying the commands within a context pane having a title bar that
15 labels the context pane and a controls area that exposes the commands to the user.

16
17 51. (Original) The method of claim 50, wherein the context pane is not
18 collapsible.

19
20 52. (Original) The method of claim 50, wherein the context pane must
21 be closed by the user.

22
23 53. (Original) The method of claim 50, wherein the user must request
24 the context pane to be displayed.
25

1 54. (Original) The method of claim 50, wherein some of the commands
2 in the controls area can be context-sensitive and are disabled if they are out of
3 context.

4
5 55. (Original) The method of claim 50, wherein the context pane
6 includes a context-sensitive help feature that displays help information that is
7 contextually related to a context pane.

8
9 56. (Original) The method of claim 55, wherein the help feature is
10 accessible via an icon on the title bar.

11
12 57. (Original) The method of claim 55, wherein the help feature is
13 displayed in a modeless manner.

14
15 58. (Original) The method of claim 50, wherein multiple context panes
16 are stackable in a queue.

17
18 59. (Original) One or more computer-readable media having computer-
19 readable instructions thereon which, when executed by a computer, implement the
20 method of claim 46.

21
22 60.-68. (Cancelled).

23
24 69. (Previously Presented) A computing system comprising:
25 a single application program configured to provide:

1 a single navigable window;
2 multiple different functionalities to which the single navigable window can
3 be navigated by a user; and
4 at least one context-sensitive command area that is associated with the
5 single navigable window, the single application program being configured to
6 automatically change command sets that are presented to the user within the
7 command area as the user navigates to different functionalities, at least some
8 commands of the command sets being displayable independent of the user
9 selecting any displayed menu item.

10
11 70. (Original) The computing system of claim 69, wherein the single
12 application program is configured to provide navigation instrumentalities
13 associated with the single navigable window, the navigation instrumentalities
14 being configured for use by the user to navigate the single window to the different
15 functionalities.

16
17 71. (Original) The computing system of claim 70, wherein one of the
18 navigation instrumentalities comprises links associated with each of the multiple
19 different functionalities to which the single navigable window can be navigated.

20
21 72. (Original) The computing system of claim 70, wherein one of the
22 navigation instrumentalities comprises browser-like navigation buttons that can be
23 used, in connection with the navigation model, to navigate the single navigable
24 window between the different functionalities.
25

1 73. (Original) The computing system of claim 69, wherein the multiple
2 different functionalities comprise document-centric functionalities.

3
4 74. (Previously Presented) A computing system comprising:
5 a single application program configured to:
6 display a single navigable window for a user to use in navigating between
7 multiple different functionalities that can be provided by the single application
8 program;

9 provide at least one context-sensitive command area that is associated with
10 the single navigable window, the single application program automatically
11 changing command sets that are presented to the user within the command area as
12 the user navigates to different functionalities, at least some commands of the
13 command sets being displayable independent of the user selecting any displayed
14 menu item; and

15 incorporate different functionalities in an extensible manner so that the user
16 can use the single navigable window to navigate to the different incorporated
17 functionalities.

18
19 75. (Original) The computing system of claim 74, wherein the single
20 application program is configured to provide navigation instrumentalities
21 associated with the single navigable window, the navigation instrumentalities
22 being configured for use by the user to navigate the single window to the different
23 functionalities.

1 76. (Original) The computing system of claim 75, wherein one of the
2 navigation instrumentalities comprises links associated with each of the multiple
3 different functionalities to which the single navigable window can be navigated.
4

5 77. (Original) The computing system of claim 75, wherein one of the
6 navigation instrumentalities comprises browser-like navigation buttons that can be
7 used to navigate the single navigable window between different functionalities.
8

9 78. (Previously Presented) A computing method comprising:
10 displaying a user interface that comprises a single navigable window that
11 can be navigated between multiple different functionalities that are provided by a
12 single application program;

13 receiving user input that indicates selection of a particular functionality;
14 responsive to receiving said user input, navigating the single navigable
15 window to the particular selected functionality and displaying in said window
16 indicia of said functionality that can enable a user to accomplish a task associated
17 with the particular selected functionality;

18 determining a user's context within the selected functionality; and
19 automatically displaying at least one command for the user based on the
20 user's context independent of the user selecting any displayed menu item.
21

22 79. (Original) The computing method of claim 78 further comprising
23 automatically removing said at least one command from the display responsive to
24 change in the user's context.
25

1 80. (Previously Presented) A method of exposing commands in a
2 software application program comprising:

3 determining a user's context within an application program by ascertaining
4 a user's selection within a document provided by the application program; and
5 automatically displaying at least one command on a display for the user
6 based on the user's context.

7
8 81. (Previously Presented) The method of claim 80 further comprising
9 automatically removing said at least one command from the display responsive to
10 a change in the user's context.

11
12 82. (Previously Presented) The method of claim 80, wherein the
13 application program comprises a document-centric application program and said
14 displaying does not obscure a document in which the user is working.

15
16 83. (Previously Presented) The method of claim 80, wherein the
17 application program comprises a document-centric application program and said at
18 least one command is displayed in a modeless fashion in which the user can
19 continue to work within a document while said at least one command is displayed.

20
21 84. (Previously Presented) The method of claim 80 further comprising
22 after said displaying, executing a command without requiring any action from a
23 user other than selecting the command.
24
25

1 85. (Previously Presented) The method of claim 80, wherein said
2 context pertains to various tasks the user may attempt to accomplish.

3
4 86. (Previously Presented) The method of claim 80, wherein said
5 context further pertains to one or more of the following: a type of document the
6 user is working in and a state of a document the user is working in.

7
8 87. (Previously Presented) The method of claim 80, wherein said
9 displaying is independent of a user selecting any displayed menu item.

10
11 88. (Previously Presented) A method of exposing commands in a
12 software application program comprising:

13 determining a user's context within an application program; and
14 automatically displaying at least one command on a display for the user
15 based on the user's context, independent of a user selecting any displayed menu
16 item.

17
18 89. (Previously Presented) The method of claim 88 further comprising
19 automatically removing said at least one command from the display responsive to
20 a change in the user's context.

21
22 90. (Previously Presented) The method of claim 88, wherein the
23 application program comprises a document-centric application program and said
24 displaying does not obscure a document in which the user is working.

25

1 91. (Previously Presented) The method of claim 88, wherein the
2 application program comprises a document-centric application program and said at
3 least one command is displayed in a modeless fashion in which the user can
4 continue to work within a document while said at least one command is displayed.

5
6 92. (Previously Presented) The method of claim 88 further comprising
7 after said displaying, executing a command without requiring any action from a
8 user other than selecting the command.

9
10 93. (Previously Presented) The method of claim 88, wherein said
11 context pertains to various tasks the user may attempt to accomplish.

12
13 94. (Previously Presented) The method of claim 88, wherein said
14 context pertains to one or more of the following: a type of document the user is
15 working in and a state of a document the user is working in.
